

Mutasi Kromosom *Chromosome Mutation*

Mutasi kromosom berlaku apabila terdapat perubahan dalam bilangan atau struktur kromosom. Perubahan ini berlaku akibat kecacatan semasa proses pembahagian sel. *Chromosome mutation occurs when there is a change in the number of chromosomes or in the structure of chromosomes. These changes occur due to errors during the cell division process.*

Mutasi Gen *Gene Mutation*

Mutasi gen adalah disebabkan oleh perubahan kimia yang berlaku pada sesuatu gen. Mutasi gen menyebabkan perubahan dalam ciri yang dikawal oleh gen tersebut. *Gene mutations are caused by chemical changes that occur in the genes. Gene mutations cause changes in the traits controlled by the gene.*
