

Part 3 & 4

Practice 1

Part 3

Read the text below and answer the questions that follow. For each question, choose the correct answer A, B or C.

The Wicked Prince

Good morning to the chairperson, the honourable judges, teachers and friends. Today, I would like to tell you a story entitled The Wicked Prince.

Once upon a time, there was a wicked and powerful prince. He went around the world conquering countries. Soon, he became very proud of his success.

One day, he said, "I've conquered the world. Now, I want to conquer heaven as well!" So, he ordered his men to build him a ship that could take him to the sky.

After six months of hard work, the ship was finally built. One thousand eagles were harnessed to the ship. At the prince's command the eagles flew upwards, pulling the ship and the prince towards the Sun.

As the ship soared higher, the prince saw a dark cloud. He went towards the dark cloud and saw that it was actually a swarm of bees. The bees stung the prince. The prince tried to attack the bees but he fell out of his ship and died.

I hope you enjoyed my story and learnt a lesson from it. Thank you for lending me your ears.

1. Why did the prince become proud?
 - A He was wicked and rich.
 - B He thought he could conquer heaven.
 - C He succeeded in conquering many countries.
2. The ship was built by
 - A the bees.
 - B the eagles.
 - C the prince's men.
3. What happened to the prince in the end?
 - A He conquered heaven.
 - B He fell from the ship and died.
 - C He was stung to death by the bees.
4. The pupil telling the story is probably
 - A telling the story for fun.
 - B entertaining her teachers and friends.
 - C taking part in a storytelling competition.
5. What do you think is the moral of the story?
 - A Bees are deadly.
 - B We cannot conquer heaven.
 - C It does not pay to be proud and greedy.

Practice 2

Part 4

Read the texts about three different learning styles. For each question, choose the correct answer (A, B or C) which fits the description.

A	Visual Learner The first way of learning is by seeing or visualising. A visual learner is someone who learns best by seeing what he or she is studying. He or she learns from looking at pictures, written words or demonstrations. Visual learners prefer to read for themselves rather than have stories read to them. They find it easier to remember things that they see.
B	Auditory Learner The second way of learning is by hearing. An auditory learner is someone who learns best hearing things. He or she prefer listening to a story than reading it. Auditory learners remember what they hear more easily than what they see.
C	Kinaesthetic Learner The third way of learning is by doing. A kinaesthetic learner is someone who learns best by doing tasks. For example, if a kinaesthetic learner wants to learn how to cook, he or she learns best by trying out cooking.

A – Visual Learner
B – Auditory Learner
C – Kinaesthetic Learner

0. Hani loves watching YouTube to learn how to cook. (A)
1. Which learner use ears more than other organs? ()
2. Which learner like to look at pictures? ()
3. Which learner learns by performing the action? ()
4. Siti is good at knitting after months of practising. ()
5. Which learner likes doing experiments? ()
6. Which learner enjoys reading? ()
